INCLUDED IN THIS TABLE ARE FULL-TIME AND PART-TIME PRINCIPALS AND ASSISTANT PRINCIPALS IN FULL-TIME EQUIVALENCY, PAID FROM ALL SOURCES OF FUNDING...PUBLIC SCHOOL PERSONNEL, ONLY.

FOUR OF THE SMALLER DISTRICTS REPORTED NO PRINCIPALS. GENERALLY A HEAD-TEACHER SERVES IN THIS CAPACITY; OR THE SUPERINTENDENT MAY SERVE, PART-TIME, IN THE CAPACITY OF PRINCIPAL.

DATA REPORTED TO THE STATE DEPARTMENT OF EDUCATION SEPTEMBER 15, 1979.

1/ PRINCIPALS WITH BA DEGREES ARE SERVING IN THAT POSITION BECAUSE THEY ARE FULFILLING THE DUTIES OF SCHOOL PRINCIPAL. A ONE-YEAR CERTIFICATION WAIVER HAS BEEN ISSUED TO THEM BY THE STATE DEPARTMENT OF EDUCATION SO THAT THEY MAY COMPLETE THE REQUIREMENTS FOR PRINCIPAL. THIS NUMBER HAS BEEN INCLUDED IN THE MA COLUMN IN TABLE XV.

STATEWIDE TESTING PROGRAMS IN PUBLIC SCHOOLS

STATEWIDE TESTING PROGRAMS

The information in this section provides the most recent test scores from the major statewide testing programs administered by the Evaluation, Assessment, and Testing Unit. Additionally, statewide data on the ACT and SAT college entrance examination programs are presented, although these testing programs are arranged by students directly with the testing companies. The following sections are included here:

1. An Overview of Statewide Testing Programs
2. The Standardized Testing Program
3. The New Mexico High School Proficiency Exam
4. New Mexico Vocational Skills Statewide Test Results
5. G.E.D. Summary Data
6. G.E.D. Diplomas by Test Centers
7. ACT and SAT Scores

Further information on any of these programs can be found in numerous reports prepared by Evaluation Unit staff members, consisting of:

1. The New Mexico Standardized Testing Program Report,
2. The New Mexico High School Proficiency Examination Results,
3. The New Mexico Vocational Skills Evaluation Program Results, and
4. ACT and SAT Results.

The Unit also produces The New Mexico School District Profile, a district-by-district breakdown of demographic and test result data; How New Mexico Stacks Up in Education, which provides a demographic, educational, and financial overview of New Mexico and other Rocky Mountain States; and the New Mexico Dropout Study, which illustrates the dropout rate in this state, by grade level, district, and other variables.

All reports are available from the Evaluation, Assessment, and Testing Unit, State Department of Education, Education Building, Santa Fe, New Mexico 87503.

STANDARDIZED TESTING PROGRAM

The New Mexico Standardized Testing Program was designed primarily to assess the achievement of all fifth, eighth, and eleventh grade students (with the exception of some Special Education students) for the following purposes:

1. to provide longitudinal standardized test data for state and local program evaluation,

2. to identify trends, and

3. to highlight educational areas for instructional improvement.

A standardized norm-referenced test, the Comprehensive Tests of Basic Skills, Form S (CTBS/S), was selected to measure achievement in the basic skill areas of Reading, Language, Mathematics, Reference Skills, Science, and Social Studies.

All New Mexico school districts participated in the 1979-80 Standardized Testing Program, and a total of 55,279 students were tested in Spring, 1980. At Grade 5, 18,779 students to the CTBS test; 18,747 eighth grade students were tested; and at Grade 11, 17,753 students were administered the test.

The results of the 1980 testing indicate that, on the whole, all students scored above the national median percentile in Reference Skills, Science, and Social Studies. Fifth graders' scores fluctuate from just under to slightly over the national median percentile; eighth graders' scores generally cluster around the national median percentile, yet scoring somewhat lower than fifth graders. Overall, eleventh grade students registered scores below the national median. In Science and Social Studies, however, eleventh graders earned scores higher than the national median. See Figure 1.

Figure 2 presents the percentages of New Mexico 5th, 8th, and 11th graders scoring in each National quartile for Reading, Language, Mathematics, and Battery Totals. At the fifth grade level, a higher percentage of students fall into the upper two quartiles than in the lower quartiles, while at the eighth and eleventh grade levels, with the exception of eighth grade Mathematics scores, the students are more heavily represented in the lower quartiles.

For further detailed statistics and analysis, refer to the New Mexico Standardized Testing Program Report, published by the New Mexico State Department of Education.

NEW MEXICO HIGH SCHOOL PROFICIENCY EXAMINATION

1979 - 80

The New Mexico Basic Skills Plan was adopted in April, 1977 by the State Board of Education. A fundamental aspect of the plan called for the development of a statewide assessment of student proficiency to meet a performance requirement for diploma endorsement. The Adult Performance Level Test (APL), produced by the American College Testing Program, was used as a portion of the statewide proficiency assessment. The proficiency requirement does not preclude the requirements for a high school diploma set forth in Educational Standards for New Mexico Schools or district requirements. The proficiency examination results are specifically for the purpose of diploma endorsement consideration. A second fundamental aspect of the State Basic Skills Plan was the requirement for local school districts to provide remedial instructional programs for students who did not meet the 65% items correct minimum criteria for receiving a diploma endorsement.

The New Mexico High School Proficiency Examination consists of test items which have been developed to assess the following skill areas: Identification of Facts and Terms, Reading, Writing, Computation, and Problem Solving. These five skill areas are assessed in in the context of the following content areas: Community Resources, Consumer Economics, Government and Law, Occupational Knowledge and Health.

TABLE 1

New Mexico High School Proficiency Examination

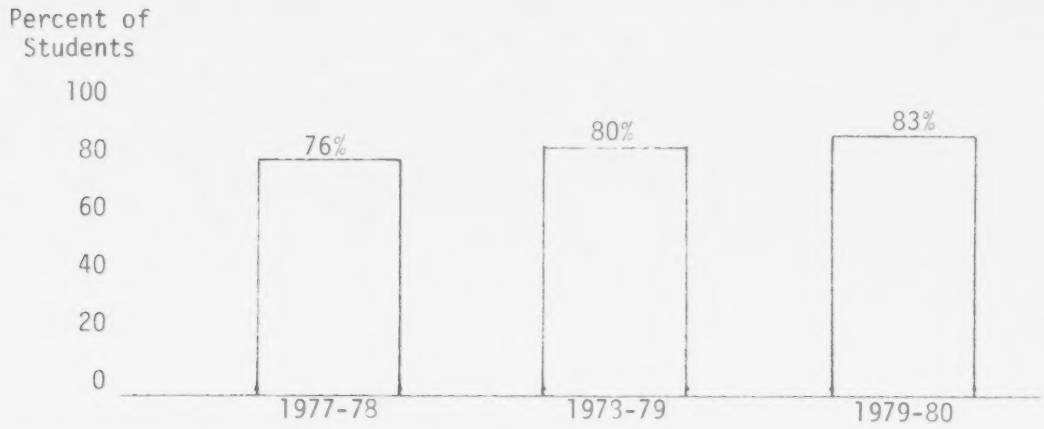
Summary Information 1979-80

Number of Students Tested (Tenth Grade)	21,455
Proficiency Standard Set At	65% Correct
Number and Percent Scoring At or Above Proficiency Standard	17,965/83%
Number and Percent Scoring Below Proficiency Standard	3,490/16%
Range of Raw Scores	1-197
Range of Percentage Correct Scores	0-98%

Based on this information, 83% of the total number of the Tenth Grade students who participated in the proficiency testing received a score equal to or greater than the 65% items correct proficiency standard.

Figure 1

Percent of New Mexico Tenth Grade Students Achieving A Score Equal To Or Greater Than The Proficiency Standard* On The New Mexico High School Proficiency Examination 1977-78, 1978-79, And 1979-80

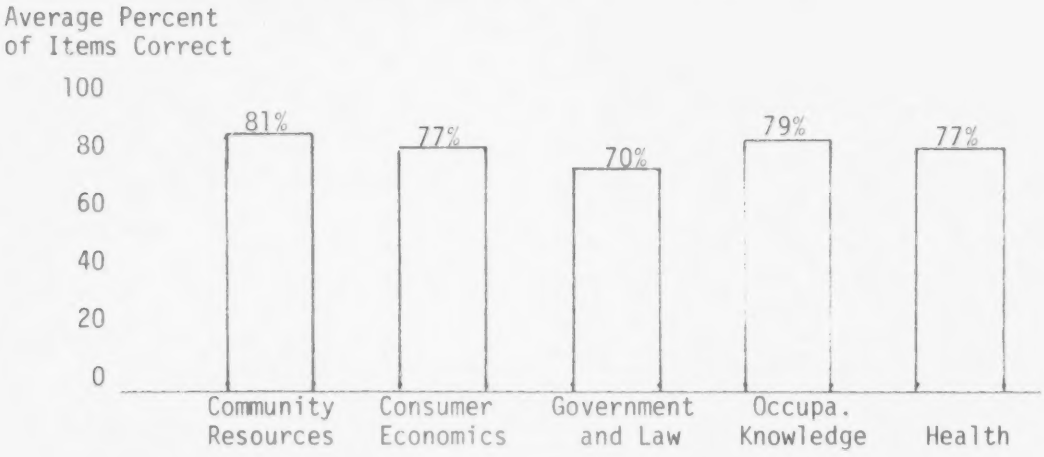


*Proficiency Standard = 65% of Total Items Correct

Figure 1 reflects a gain of seven percentage points in the total percentage of tenth grade students who achieved a score equal to or greater than the proficiency standard, between the initial testing year 1977-78 and the testing year 1979-80. A corresponding reduction in the percentage of students who did not achieve a score which meets the proficiency standard over the same time span can also be observed.

Figure 2

The Average Percent Of Items Correct Achieved By Tenth Grade Students In Each Content Area



These percentages represent a 2 percentage point gain in Community Resources, a 4 percentage point gain in Consumer Economics, a 4 percentage point gain in Government and Law, a 5 percentage point gain in Occupational Knowledge, and a 2 percentage point gain in Health. These percentage point gains are made by tenth grade students between this testing year and the previous testing year.

NOTE: The State Department of Education, consistent with recommendations from school districts, has placed a moratorium on the Vocational Testing program for the 1980-81 school year. During the period of the moratorium, the State Department of Education, in conjunction with local school districts, will revise goals and objectives, develop new items and upgrade the Vocational Skills Testing program.

SUMMARY OF GENERAL EDUCATIONAL DEVELOPMENT (G.E.D.) TESTING, 1979

Basic Facts	State	National
Number tested for first time	5,945	. . . . .
Pass Rate (%)	61.7	60.1
Number of Diplomas Issued	5,656	434,617
Average Schooling Level (Grade)	10.0	10.0
Average Age (Years)	22.9	24.7

The General Educational Development Test (G.E.D.) is primarily used to appraise the educational development of adults who have not completed their formal high school education. The G.E.D. Testing Program operates in accordance with state requirements and supervision, and national policies. Candidates who successfully complete the battery of tests receive a New Mexico High School Diploma.

There are five subtests in the G.E.D. battery. They are: Writing Skills (80 items, 60 minutes); Social Studies (60 items, 90 minutes); Science (60 items, 90 minutes); Reading Skills (40 items, 60 minutes); and Mathematics (50 items, 60 minutes). These five tests are designed to measure as directly as possible, the major generalizations, ideas, and intellectual skills that are the outcome of four years of high school programs of instruction.

In general, the following are requirements for issuance of a diploma. A candidate must obtain a standard score of 40 on each of the five tests, or an average standard score of 50 on all five tests. He/she must be a resident of the state of New Mexico, and be 18 years old. However, if the individual meets the age requirement but his/her high school class has not graduated, the candidate cannot receive his/her diploma until graduation occurs.

New Mexico has a very high percentage of G.E.D. candidates who are 19 or under (50.9%), the second highest in the country. The national average is 35.4% for the same age group.

The number of diplomas issued in 1979 was 5,656; up considerably from 5,009 in 1978.

The American College Test (ACT) and the Scholastic Aptitude Test (SAT) are the two major standardized tests used to provide an indication of how well an individual student may be expected to perform in the collegiate academic arena. It should be noted that the tests do not attempt to measure innate intelligence nor do they stress specific factual knowledge. The ACT battery contains four multiple choice tests in the areas of English usage, mathematics usage, social studies reading, and natural sciences reading. Scale scores on each of these tests range from one to thirty-six. Scores on the Scholastic Aptitude Test, which has two areas - verbal and mathematical - are reported on a scale of 200 to 800.

* = Includes cost of Regular, Special and Kindergarten transportation.
** = Per Capita Feeders removed.
*** = Since New Mexico has many isolated, rural areas, statutes provide for reimbursement to parents on a per capita basis to meet school buses where "regular school bus service is impractical because of distance, road conditions, or the sparseness of population." During the 1979-80 school year, 704 of these arrangements operated in 74 of the 88 districts. A total of 1,476.0 pupils were transported, with a daily mileage (one round trip) of 12,845.2, and a cost of $422,990.86.

ADULT BASIC EDUCATION

Authority: Adult Education Act - Public Law 91-230 as amended by Public Law 95-561. Federal Catalog of Domestic Assistance #13.400.

Purpose

It is the purpose of the Adult Education Act to expand educational opportunities for all adults over 16 years of age who have not completed the 12th grade, or whose level of achievement is below that which is deemed necessary in order to successfully function in society. The state ABE program is made available to all adults who meet the above criteria. All young adults between the ages of 16-18, must be classified as school drop outs. Written permission of both the parent and the local school authority is required before enrollment is approved.

Programs established under the auspices of the Act provide educational services designed to meet the following objectives:

1. Assist adults to acquire basic skills necessary to function in society.
2. Assist adults in their efforts to complete all requirements for a New Mexico high school diploma.
3. Assist non-English speaking adults to acquire basic communication skills in the English language.
4. Assist adults in learning those skills that will enable them to become more employable, productive, and responsible citizens.

ABE In New Mexico

There are presently 12 full-time regional centers in New Mexico. These are located in Albuquerque, Santa Fe, Gallup, Farmington, Las Cruces, Las Vegas, Taos, Espanola, Clovis, Roswell, Alamogordo, and Carlsbad. Each of these full-time centers also provide part-time satellite programs in rural communities within their region. Other part-time projects which receive direct funding include: Hobbs, Silver City, Cobre, Socorro, Grants, and Artesia. In addition, ABE services are made available to institutionalized adults in cooperation with the State Department of Corrections. A special program is located at the Roswell Vocational Rehabilitation Center.
